

ARE YOU A TEAMSTER WORKING CONSTRUCTION?

GET AED CERTIFIED BY THE TEAMSTERS CONSTRUCTION DIVISION!

Teamsters working in construction are the most professional and dedicated in the entire industry. To uphold our union standards, the Teamsters Building Material and Construction Trades Division and Teamsters Locals 110 and 341 are holding a series of three-day training sessions in Seward, Pennsylvania for members interested in gaining accreditation to drive Articulated End Dump (AED) vehicles.

This highly specialized and valuable work is vital for construction projects that require off-road transportation. During these all-day training sessions, you will gain hands-on experience with AEDs and receive official certification from your union.

Each class is three days and will be held Monday/Tuesday/Wednesday or Thursday/Friday/Saturday beginning Monday, August 31 and run through Saturday, September 26.

Members are responsible for their own transportation and lodging during the training session.
